

Product Safety Recall

Harness adjustor
button

Britax ClickTight Convertible Car Seats

Models Affected – manufactured between 1 August 2014 and 29 July 2015

E9LT95Q - ADVOCATE CT US CIRCA

E9LT71Q - MARATHON CT US, COWMOOFLAGE

E9LT75R - MARATHON CT US, VERVE

E9LT85Q - BOULEVARD CT US, CIRCA

Model and date are found on the label under the cover at the front of the seat.

Only seats with this ClickTight dial, within the date range and without green labels beside the model label, are included in the recall.

Defect: The red harness adjuster button may stick in the down (unlocked) position after the harness is loosened. Do not use the seat if the button remains down (unlocked) - It is unsafe.

Hazard: If the defect occurs, the shoulder straps can loosen and may not adequately protect your child in the event of a motor vehicle crash.

What to do: Contact Britax Childcare NZ to arrange a remedy kit to be mailed to you. Kits will be sent out from 1 September. In the interim you can continue to use the seat safely by making sure the red harness adjuster button locks in the out position when securing your child.

Contact details: Call Britax on (09) 443 0102 (Monday to Friday 9:30am to 4:30pm), or complete the online order form on: <http://www.britax.co.nz/ProductRecall.aspx>
